

## History

Employment Ventures is a non-profit career counseling and development organization with focus on providing equal opportunity career assistance and training to individuals desiring to obtain employment opportunities, change or advance in their careers.

Employment Ventures seeks to obtain service provision contracts from Community Business Organizations and state funded programs operating as Social and Human Service providers to give clients the tools they need in employment and life skills training, so they will reach their employment and self-sufficiency goals at faster and or smoother transitional rates.

Employment Ventures specializes in serving individuals with barriers to employment through unique case management methods, knowledge and access to various community resources, and successful referral processes that are monitored and managed personally by the organization.

The key success factor for this company is that it recognizes that not everyone can afford high priced Head Hunters and Career-Assisted Services. Many job seekers are underemployed, dislocated, laid off with limited income, or on a form of public assistance.

These barriers make it difficult to execute a comprehensive employment search. Realizing that any task associated with finding or changing employment can turn into a full time job in itself, Employment Ventures provides a smooth path toward assisting individuals in meeting their employment goals.
